

Dun & Bradstreet Data Blocks

Modern, best-in-class data delivery

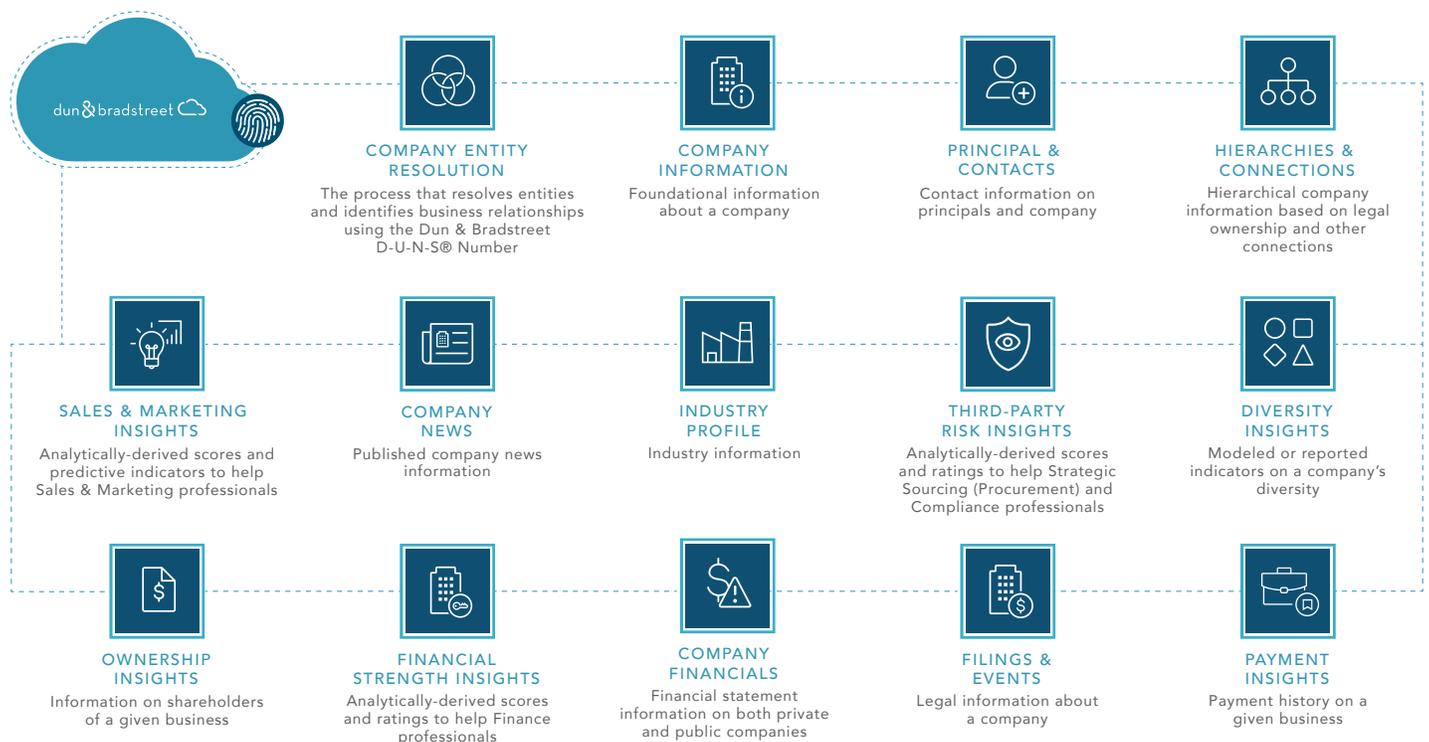

In today's ultra-competitive marketplace, data-driven organizations have a clear advantage over their rivals. To get this advantage, businesses, government agencies and not-for-profit organizations all over the world turn to Dun & Bradstreet to help accelerate revenue, manage risk, reduce costs, and transform digitally through the power of data and insights delivered from the Dun & Bradstreet Data Cloud.

As important as data quality is, how data is delivered, the ease in which it can be consumed, and the speed at which a business can transform information into value is equally important. To meet these needs, Dun & Bradstreet delivers data in packages called Data Blocks.

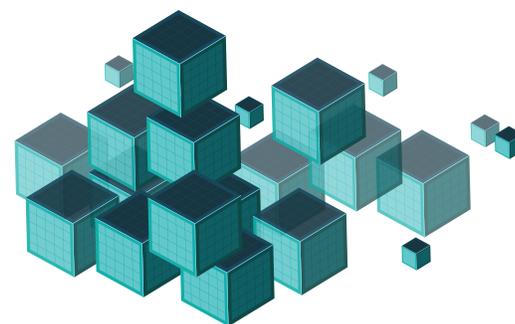

A Data Block is a logical, topic-based grouping of data elements from the Dun & Bradstreet Data Cloud. It is a modern, best-in-class method of serving data in a simple, standardized, and flexible way. Data Blocks empower clients to easily ingest the world-class data they require across their enterprise and do that in a consistent and scalable manner.

Clients can 'stack' data blocks together to customize the data and insights they require to address any use case across their business. Any specific combination of Data Blocks can be delivered via API, flat files, or a combination. Data Blocks are licensed by domain: Sales & Marketing, Finance, Supply, and Compliance.

A RANGE OF DATA BLOCKS TO MEET YOUR UNIQUE NEEDS

With Data Blocks, clients experience superior data quality delivered consistently. In addition, Data Blocks quicken the time from delivery to value realization with simple, standard implementation and activation. Lastly, clients benefit from flexibility and scalability, enjoying seamless delivery regardless of how much or how little content is ingested, where used, or what need is being addressed.

Data management is complex; Dun & Bradstreet Data Blocks make it easier than ever for clients to experience the power of tailored delivery aligned with unique business needs.

HERE ARE JUST SOME OF THE WAYS CLIENTS CAN USE DATA BLOCKS:

DUN & BRADSTREET DATA CLOUD

The Dun & Bradstreet Data Cloud offers the world's largest set of business decisioning data and analytical insights, covering hundreds of millions of businesses and other commercial entities across the globe. We source data from tens of thousands of sources, tens of millions of websites, and crowd-validating initiatives. Additionally, we leverage information from our global sources, along with proprietary capabilities, to discover and curate millions of business-to-business relationships. These relationships can include corporate hierarchies, ultimate beneficial ownership, alternative-type relationships, historical ownership, and analytically derived connections.

We continuously monitor our vast number of sources for changes that impact information in the Dun & Bradstreet Data Cloud, including dynamic changes to business relationships. Changes are verified, and updates made to the Data Cloud as relevant. Our Data Blocks Monitoring capability advises of such changes.
