

Recent Trends and Developments in Blockchain Technology

13 November 2020,
Wednesday,
3pm to 4pm.

Complimentary.

*Limited slots available,
prior registration is required.*

The popularity of Blockchain technology has seen a meteoric rise in the recent years. The COVID-19 pandemic brings with it immense opportunities for the technology to move away from being a mere experimental Proof-of-Concept to a technology which offers significant revenue investment for real enterprise-ready solutions.

With the global blockchain hype bringing about a diversification of the pool of players and ecosystems, the adoption of this technology looks set to accelerate beyond fintech applications.

During this 1-hour webinar, Vice President of the Institute of Blockchain, Mr Ian Lee, will be sharing with you how can you use and harness blockchain technology to drive your business and address the common misconceptions of Blockchain.

The following topics would also be covered during the session:

- Cryptocurrency
- Smart Contract
- Compliance and Trade Finance
- Future of Blockchain

About the Speaker

Ian Lee is part of the founding team at Merkle Science and currently sits as its Vice-President of Business Development. A Singapore qualified lawyer, Ian had previously worked in the corporate and capital markets industry before joining Merkle Science. A strong advocate of a distributed ledger technology, Ian also serves as Vice-President of the Institute of Blockchain, on the Regulatory & Compliance Sub-Committee of the Singapore Blockchain Association and is a founding member of the Compliance Association & Network of Singapore. In his role at Merkle Science and Institute of Blockchain, Ian regularly conducts training for regulators, law enforcement and enterprises.
