

## INTRODUCTION

Critical thinking skills is one of the key elements needed for today's evolving workforce. It elevates a passive recipient to an active learner of information. Such skill set enables one to identify, analyse problems while deriving to a solution in a systematic way. Critical thinking is about questioning and learning with an open mind. This workshop coupled with real life case studies enables participants to bring forth their thought excellence in a systematic manner.

## OBJECTIVES

By the end of the workshop you will be able to:

- To gain insights and strengthen critical thinking skills
- Understand the clear distinction between the differences is between 'being knowledgeable', 'being intelligent' and 'being wise'.
- Apply a systematic approach to critical thinking
- Ability to derive decisive solutions for your organisation.
